

Couplers

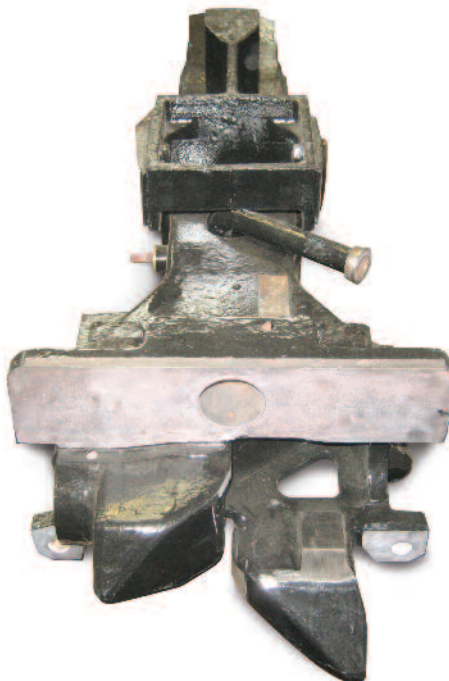

The complete repair service...

For many years Tecforce has provided a high quality Coupler Repair Service to a wide range of rail clients. Our core skills in materials technology, welding technology, Non-Destructive Testing and traction and rolling stock engineering ensure that we can deliver a comprehensive and industry-leading solution.

Customers can rely upon us to follow their own procedures stringently whilst benefitting from the added value of expert insight and problem solving, resulting in improved processes and practices.

The services include in our Coupler Overhaul Service are:

- > Washing
- > Inspecting alignment faces – examining wear build up
- > NDT
- > Recovery of worn surfaces
- > Heat treatments
- > Wear plates
- > Painting
- > Incident damage repair
- > Lug replacement/repair
- > Horn realignment

“ Industry-leading solutions designed to deliver a first class Coupler Overhaul Service, combined with expert advice to improve ongoing practices and processes ”
