

# Fuel Tanks

## Repair, modification & test...

With a long and successful history of overhauling components, Tecforce is the team to trust when it comes to Fuel Tank repair, modification, overhaul and testing services.

Our core skills in materials technology, welding technology, Non-Destructive Testing and traction and rolling stock engineering ensure that we offer a comprehensive and seamless service - and our clients can be confident that they are benefitting from thorough, detailed overhauls and reliable repairs.

*Processes are specifically aligned to customer requirement and typically include:*

- > **Wash - internally and externally**
- > **Hydrostatic test - gasket replacement and coats to both internal and external surfaces**
- > **NDT**
- > **Repair**
- > **Paint**
- > **Modification**

Client procedures are stringently observed during test and overhaul but we also

take the opportunity to evaluate and contribute, with a view to improving safety and reducing downtimes of vehicles - it's all part of the Tecforce service.

For Fuel Tank repair and overhaul, Tecforce is definitely tried, tested and trusted.

“A comprehensive and seamless Fuel Tank repair and overhaul service combined with the unique Tecforce process evaluation - designed to improve safety and reduce downtime”
