

Gangway Faceplates

Repair and replacement service

As part of our ongoing commitment to extending the scope of our On Depot Servicing, Tecforce are continually looking for opportunities to add to the overall service package, making us a one-stop choice for servicing and maintenance requirements.

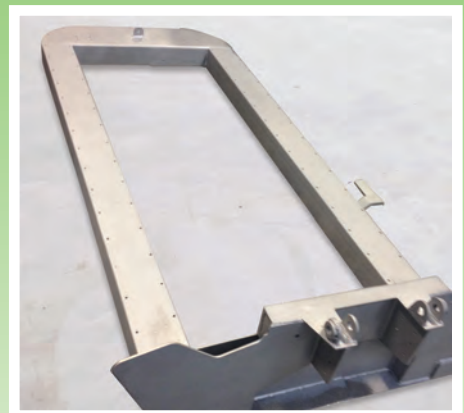

Gangway Faceplates can be easily overlooked but Tecforce has identified that there is a significant amount of degradation caused by corrosion to gangway faceplates which compromises structural integrity.

Our programme of preventative repair or, if needed, replacement services includes:

- > **Examination of the Faceplate and identification of corroded sections and structural deficiencies**
- > **Removal or replacement of sections, conduct weld build-up repair and complete faceplate replacement to:**
 - Side Plates
 - Channel Sections
 - Bottom Assembly
- > **Service exchange to eliminate lead times**

We repair Faceplates to client's procedures and can also make a valuable contribution by developing and adapting procedures for added reliability and longevity.

Using our expertise in Non Destructive Testing, Welding and Traction and Rolling stock engineering Tecforce offers the highest calibre of service designed to deliver cost-effective solutions and reduce down time of vehicles.

“ A comprehensive package of Gangway Faceplate maintenance and replacement, designed to deliver cost-effective solutions and reduce down time of vehicles ”
