

Multi-skilled experienced operatives,
on site, on time, to suite your schedule...

On Depot Servicing

Flexible, responsive and comprehensive, Tecforce's On-Depot Services provide on-the-spot assistance to clients nationwide. Supported by our core consultancy skills of materials technology, welding technology, Non Destructive Testing and traction and rolling stock engineering we provide a complete package including damage assessments, repair procedure development and letter of comfort in accordance with RSSB Technical Note TN 028 "Minor Repairs".

Service delivery is:

- > **Flexible**
- > **By a multi-skilled team of the appropriate number**
- > **On the clients' site**
- > **Scheduled around work at overhaul or modification**

All welding is fully qualified to EN standards and NDT is carried out to RIS 2701 RST, ensuring traceability and compliance with National and International standards.

Full repair documentation is provided and certificates of conformance. Our scope of services include:

- > **Vehicle structure corrosion repair**
- > **Incident damage repair**
- > **Modifications**
- > **NDT**

“ A multi-skilled team on the spot to undertake repairs, modifications and testing. Our welders are fully qualified to National and International standards ”
